

Take Home Homework (Day 3) (1 of 2)

Create a new application using Create React App:

- When it first load, shows the login page: refers to <https://transition-to-react-playground.vercel.app/login> for how it look like
- When user login successfully, shows the marketplace page. <https://transition-to-react-playground.vercel.app/marketplace-mock>
- When there is no items, show empty message like this page: <https://transition-to-react-playground.vercel.app/marketplace-empty>

Notes:

- To add item to cart, use `https://<your-service>.herokuapp.com/docs/#/marketplace/addCartItem`
- To get items in cart, use `https://<your-service>.herokuapp.com/docs/#/marketplace/listCartItems`
- To remove item from cart, use `https://<your-service>.herokuapp.com/docs/#/marketplace/removeCartItem`

Take Home Homework (Day 3) (2 of 2)

You should use React styleguidist to documents your presentation components.

Deploy the site and the styleguidist site to Netlify and submit the URLs together with the link to your repository.
